SPECIAL WEATHER STATEMENT

National Weather Service FAIRBANKS AK 400 PM AKST Fri Jan 17
AKZ211-201815- Southern Seward Peninsula Coast-Including Nome, White
Mountain, and Golovin
400 PM AKST Fri Jan 17

...A Strong Winter Storm Possibly Impacting the North Slope Next Week...

A strong storm may bring blizzard conditions, heavy snow, and high winds across the West Coast. Power outages and travel delays are possible. This system could initially bring strong east winds, which combined with falling snow could result in very low visibility along the Chukchi and Bering Sea Coasts. This would also bring heavy snow and strong winds to western the Brooks Range. In the Wednesday through Friday timeframe the system is expected to move into inland, bringing strong westerly winds.

The National Weather Service in Fairbanks will continue to monitor this storm as it develops over the next several days. Please visit weather.gov/fairbanks for the latest update.

Do you use Special Weather Statements like this? How are you feeling about your risk based on this information?

Strong Winter Storm Possible Next Week for the West Coast

Created: 1/17 04:00PM AKST

Where:

- The West Coast of Alaska.

When:

- Wednesday evening through Friday afternoon.

What:

- Potential for:
 - Heavy Snow
 - Strong Winds
 - Blizzard Conditions

Additional Details:

- Confidence for this storm is moderate, so stay tuned for more updates.
- Check the official forecast at www.weather.gov/afg for details.

URGENT - WINTER WEATHER MESSAGE

National Weather Service Fairbanks AK
400 PM AKST Mon Jan 20

AKZ211-201815-Southern Seward Peninsula Coast-Including Nome, White Mountain, and Golovin

...WINTER STORM WATCH IN EFFECT FROM WEDNESDAY AFTERNOON THROUGH FRIDAY MORNING...

* WHAT... Heavy snow and blowing snow possible. Plan on very low visibility and difficult travel conditions. Blizzard conditions possible. Total snow accumulations of up to 8 inches are possible.

* WHERE....Southern Seward Peninsula Coast.

* WHEN...From Wednesday morning through Friday morning.

* ADDITIONAL DETAILS... Winds gusting as high as 60 mph will cause areas of blowing and drifting snow reducing visibility to one quarter mile or less at times. Power outages are possible due to the strong winds.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

A Winter Storm Watch means there is potential for significant snow, sleet or ice accumulations that may impact travel. Continue to monitor the latest forecasts.

An urgent message - a winter storm watch is issued. Do you use watches - do they trigger any specific actions? What else would you be looking for right now?

Do you receive briefings? Do you use them?

Winter Storm Watches Issued for the West Coast

Created: 1/20 04:00PM AKST

Where:

- North Slope, including the Chukchi + Beaufort Sea coasts

When:

- Watches begin Wednesday evening and last through Friday afternoon.

What:

- Heavy snow and strong winds expected. **Blizzard conditions possible in coastal areas.**
 - Snowfall amounts of 8-12" in coastal areas, 12-18" in Brooks Range.
 - Winds gusting to 60 mph in coastal areas

Additional Details:

- Travel may be very difficult to impossible due to low visibility
- Power outages may be possible

URGENT - WINTER WEATHER MESSAGE

National Weather Service Fairbanks AK

500 AM AKST Tue Jan 21

AKZ211-201815-Southern Seward Peninsula Coast-Including Nome, White Mountain, and Golovin

...BLIZZARD WARNING IN EFFECT FROM 6 AM WEDNESDAY TO 4 AM AKST FRIDAY...

* WHAT...Blizzard conditions expected. Travel will be very difficult to impossible. Total snow accumulations of 8 to 12 inches are expected.

* WHERE...Southern Seward Peninsula Coast.

* WHEN...6 AM Wednesday to 4 AM Friday.

* ADDITIONAL DETAILS...Winds gusting as high as 60 mph will cause frequent whiteout conditions. Winds will start from the southeast on Wednesday, switching to from the northwest by Thursday morning. Significant drifting of the snow is likely. Power outages are possible due to strong winds.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

A Blizzard Warning means severe winter weather conditions are expected or occurring. Falling and blowing snow with strong winds and poor visibilities are likely. This will lead to whiteout conditions, making travel extremely difficult.

Blizzard warning: how does this change your decision-making? What actions are you taking? What other information are you looking for?

Overall Winter Storm Impacts

Valid XX, Jan 22, 20XX 2 PM AKST through XX, Jan 24, 20XX 6 PM AKST

Blizzard conditions throughout the West Coast will likely cause major disruptions. See watches and warnings.

Storm Timeline

Created: 1/21 04:00PM AKST

Wednesday

- ☐ Heavy snow and strong winds increasing
- ☐ Blizzard conditions developing
- ☐ Travel becoming very difficult to impossible
- ☐ East winds gusting to 40-60

Thursday

- ☐ Continued blizzard conditions with snow and strong winds
- ☐ Travel remaining very difficult to impossible
- ☐ West winds gusting to 35-45 mph.

Friday

- ☐ Blizzard conditions and winds diminishing
- ☐ Travel conditions and visibility improve.

Wednesday Night

- ☐ Continued blizzard conditions with heavy snow and strong winds.
- ☐ Travel remaining very difficult to impossible
- ☐ Winds still gusting 40-60 mph, wind direction shifting to west overnight

Thursday Night

- ☐ Blizzard conditions continue, but winds and snow gradually decrease overnight
- ☐ Travel remaining very difficult to impossible

WSSI Website

Have you visited this site before?

Explain the features/give tour of the site. Note that this is for CONUS only but that there will be one for Alaska in the future.

What features of the website are most useful to you?

Is there anything that is missing? What additional functionality would be helpful?

Is there anything that is confusing?

How would you use the information/products on this site? When would you use it (i.e. how many days before storm)?

Ask about rolling window - is this useful? Would you use this and if so, how?

Do you prefer static images to the interactive website?

Anything else you would add? Look at forecasters' note and legend again. Leading components/impacts that need to be included in a useful product.
